**Note:** An Outlook Item can be one of several Outlook Item object types. Outlook 2000 Item objects include the AppointmentItem, ContactItem, DistListItem, DocumentItem, JournalItem, MailItem, MeetingItem, NoteItem, PostItem, RemotetelItem, ReportItem, TaskItem, TaskRequestItem, TaskRequestAcceptItem, TaskRequestDeclineItem, and TaskRequestUpdateItem objects. An Outlook Item can access the following property objects: Actions, Attachments, FormDescription, Links, Recipients, RecurrencePattern, Exceptions, and UserProperties.
